PROFESSIONAL EXPERIENCE

Full-Stack Development Freelancing / Gig jobs

Multiple Firms and Volunteering

Toronto, ON | Vancouver, BC | 07/2025 – 03/2026

- Architected data products and analytics solutions for diverse clients, translating ad hoc business requirements into functional specifications and system designs within compressed timelines.
- Modeled business processes, organizational structures, and data flows using SQL-driven tools to communicate insights and propose improvement scenarios to stakeholders during short-term engagements.
- Executed test plans and product testing cycles for web application modules, identifying and resolving defects in collaboration with remote development teams to ensure product quality and functionality.
- Facilitated virtual workshops and requirement-gathering sessions for independent clients, documenting business objectives and ensuring alignment between stakeholder needs and delivered solutions.
- Coordinated SIT and UAT validation for gig-based implementations, gathering feedback and managing requirements changes across concurrent projects with self-directed prioritization.

Business Solutions Analyst

Uni. Canada West: Digital Transformation (ERP/ CRM/ AI Automation)

Vancouver, BC | 09/2023 – 06/2025

- Developed and maintained business models representing processes, roles, data, and organizational structures to communicate insights and propose scenarios for operational improvements and efficiencies.
- Investigated business situations across financial and educational systems to identify problems and opportunities, conducting root cause analysis and recommending actionable improvements to leadership.
- Gathered, documented, and managed business and ad hoc requirements for CRM and ERP enhancements, ensuring continuous alignment with business objectives and diverse stakeholder needs.
- Designed functional specifications and design documents for new system capabilities, collaborating with Data Analysts and technology teams to ensure models leveraged robust data analysis practices.
- Created and executed comprehensive test plans during SIT and UAT phases, identifying defects and coordinating resolutions with development teams to uphold product quality and functionality standards.
- Engaged cross-functional stakeholders through facilitated workshops and structured meetings, gathering input and feedback to drive data-driven decision-making and seamless customer experiences.

AI Business Solutions Analyst & Project Coordinator (FinTech/ERP/Compliance - Enterprise Exposure)

Xomic Infotech Pvt. Ltd. (FinTech SaaS Platform)

Ahmedabad, India | 08/2022 – 08/2023

- Constructed business and data models for API-based fintech features, mapping organizational structures and process roles to illustrate improvement scenarios for enterprise banking clients.
- Analyzed complex business situations within compliance-driven environments, performing root cause assessments to identify opportunities for process optimization and risk mitigation.
- Documented functional specifications for 3rd party integrations, managing requirements throughout the lifecycle to maintain alignment between technical teams and business stakeholders.
- Partnered with Data Analysts and internal teams to validate analytics solutions, utilizing SQL and dashboard tools to ensure data integrity and support evidence-based decision-making.
- Orchestrated product testing and defect resolution across multiple releases, coordinating schedules and priorities while gathering stakeholder feedback in a fast-paced SaaS setting.

AI Business Solutions Analyst (Agile BSA / Product Owner Proxy) & Client Success Manager

Floatbot.ai (FinTech & InsureTech SaaS Platform based on AI NLP) Bengaluru, India (USA) | 08/2020 – 08/2022

- Designed analytics solutions and functional specifications for InsureTech platforms, investigating client situations to uncover problems and propose data-driven improvement opportunities.
- Facilitated collaborative workshops and design reviews with diverse teams, communicating complex concepts to ensure stakeholder requirements were understood and addressed.
- Monitored product quality through structured testing validations, identifying defects and engaging development partners to resolve issues before client delivery.
- Authored process documentation and status reports using project management tools, demonstrating an interest in data governance principles and robust analytical practices.

Business Analyst

CRB Tech Solutions Pvt. Ltd.

Pune, India | 11/2019 – 08/2020

- Translated banking and fintech business requirements into technical specifications, supporting the design of new systems and enhancements through structured documentation.
- Participated in facilitated sessions to map current and future state flows, gathering stakeholder input to identify gaps and recommend actionable process improvements.
- Contributed to test plan execution and project status reporting, learning to ensure data integrity and functionality while coordinating with development mentors.

Business Analyst (FL State Government — Licensing & Regulatory Systems)

Kyra Solutions, Inc.

Ahmedabad, India (USA) | 06/2018 – 11/2019

- Analyzed regulatory business situations and modeled workflow structures, engaging stakeholders to align system enhancements with compliance objectives and organizational needs.
- Supported testing validations and documentation efforts, building foundational skills in requirements management and cross-functional collaboration within data-sensitive environments.

Jr. Business Analyst (Recruitment Technology & HR Systems)

IMS People Pvt. Ltd.

Ahmedabad, India (UK) | 07/2016 – 06/2018

- Cultivated foundational business analysis capabilities by gathering requirements, mapping processes, and supporting documentation efforts to ensure timely delivery of HR technology solutions.
-
