PROFESSIONAL SUMMARY

Business Analyst with 8+ years of experience delivering enterprise digital transformation across FinTech, InsureTech, and Higher Education domains. Experienced in translating business requirements into functional and technical specifications across ERP/CRM systems, API-driven architectures, and data platforms. Recent experience includes AI-enabled solution delivery involving LLM-based workflows, conversational AI systems, and intelligent automation, with a focus on defining business requirements, workflow design, integration behavior, and validation criteria. Strong background in stakeholder engagement, process modeling, Agile delivery, and data-driven decision support, with hands-on involvement across end-to-end project lifecycles from discovery through UAT and production support.

CORE COMPETENCIES

Business Analysis & Process: BRD, FSD, SRS, RTM, user stories, use cases, acceptance criteria, BABOK-aligned analysis, BPMN 2.0, UML, AS-IS/TO-BE mapping, workflow redesign, Agile/Scrum delivery, Jira, Confluence, backlog refinement, stakeholder workshops, requirement traceability, UAT coordination

AI/ML & Intelligent Automation: AI-assisted workflow design, LLM-based business applications, conversational AI systems, GenAI-powered automation, intelligent document processing, AI-enhanced decision workflows, prompt design for business use cases, human-in-the-loop validation flows, AI feature requirements definition, AI system behavior validation

Data & BI: SQL-based analysis, Power BI (DAX, RLS), Tableau dashboards, KPI design, ETL documentation, operational analytics, business data validation, reporting layer design, data-driven decision support

Systems & Integration: Enterprise system integration analysis, REST/SOAP APIs, OAuth authentication flows, OpenAPI/Swagger specifications, CRM/ERP integration design, payload mapping, event-based workflow design, cross-system dependency analysis

Compliance & Risk: GDPR, PCI DSS, SOX, AML/KYC, FERPA, IAM, RBAC, ISO 27001, audit readiness, data access governance, regulatory workflow alignment

Domains: FinTech, InsureTech, Wealth Management, Capital Markets, Higher Education, Government Digital Services

PROFESSIONAL EXPERIENCE

Business Analyst — Contract & Consulting

Various Clients (Wealth Management, SaaS, Non-Profit)

Toronto, ON | 07/2025 – Present

- Led business requirements definition for AI-enabled enterprise transformation initiatives spanning automation, decision intelligence, and workflow orchestration across CRM/ERP environments.
- Designed end-to-end AI-assisted business workflows including multi-step automation logic, human-in-the-loop validation, and exception handling frameworks.
- Translated business problems into structured AI solution requirements covering LLM-based workflows, agent-style automation, and intelligent document processing pipelines.
- Defined evaluation criteria for AI-driven outputs (accuracy, reliability, drift indicators, and business acceptance thresholds) from a business validation perspective.
- Supported integration design discussions between AI services, APIs, and enterprise systems using REST-based architectures and event-driven workflows.
- Built KPI dashboards in Power BI to monitor automation performance, operational efficiency, and AI-assisted process improvements.

Business Solutions Analyst

Uni. Canada West: Digital Transformation (ERP/CRM/ AI Automation) Vancouver, BC | 09/2023 – 06/2025

- Contributed to enterprise modernization initiatives integrating ERP/CRM platforms with AI-assisted workflows for student lifecycle, service automation, and operational analytics.
- Gathered and translated requirements for AI-supported case management, predictive prioritization, and automated document classification within enterprise systems.
- Worked with technical teams to define integration requirements between ERP systems and AI/ML services using REST APIs, SOAP services, and secure authentication protocols.
- Modeled business processes (AS-IS / TO-BE) to identify opportunities for automation, decision support, and AI-assisted workflow optimization.
- Defined reporting and analytics requirements enabling AI-informed dashboards using Power BI and SQL-based datasets.

- Supported testing of AI-assisted workflows during SIT/UAT cycles, ensuring alignment between business expectations and system behavior.

Business Solutions Analyst & Project Coordinator (FinTech/ERP/Compliance - Enterprise Exposure)

Xomic Infotech Pvt. Ltd. (FinTech SaaS Platform)

Ahmedabad, India | 08/2022 – 08/2023

- Defined BRD, SRS, and functional requirements for a FinTech SaaS platform incorporating AI engines for real-time fraud detection, payment processing, and AML/KYC workflows under PCI DSS security standards and SOX financial reporting controls.
- Re-engineered Capital Markets transaction workflows using BPMN 2.0 and UML AS-IS/TO-BE maps, optimizing AI-driven resource allocation and throughput to lower operational costs by 18% within two quarters.
- Performed API integration analysis for AI/ML engines and payment gateways including Stripe and PayPal, documenting REST and SOAP payload structures, OAuth protocols, and error-handling logic to enable real-time ERP and CRM interoperability.
- Authored ETL specifications, SQL transformation scripts, and metadata documentation to standardize training and inference data for AI models, then designed Tableau KPI dashboards that supported C-suite executive decision-making and data governance.
- Managed Scrum delivery processes including sprint planning, backlog prioritization, and daily stand-ups in Jira and Confluence for a 12-member team, releasing 4 major platform updates including AI feature rollouts while coordinating GDPR data-privacy reviews and vulnerability assessments.

AI Business Solutions Analyst (Agile BSA / Product Owner Proxy) & Client Success Manager

Floatbot.ai (FinTech & InsureTech SaaS Platform based on AI NLP)

Bengaluru, India (USA) | 08/2020 – 08/2022

- Led end-to-end business analysis for conversational AI and NLP-based automation tools serving FinTech and InsureTech clients, authoring user stories and acceptance criteria that improved claims processing efficiency by 30%.
- Defined AI model performance metrics, accuracy benchmarks, and drift monitoring frameworks for NLP and sentiment analysis models, ensuring alignment with Responsible AI principles, ISO 27001, SFTR, and CISO compliance.
- Developed business cases and UX specifications for AI-powered CRM enhancements and customer-facing portals, increasing user adoption by 40% and reducing average transaction processing time through iterative SIT and UAT cycles.
- Led hypercare support and operational handovers for 3 AI production releases, creating Power BI and Tableau compliance monitoring dashboards with statistical forecasting models while reducing post-production defects by 30% via structured QA and defect tracking in Jira and Confluence.

Business Analyst

CRB Tech Solutions Pvt. Ltd.

Pune, India | 11/2019 – 08/2020

- Gathered business requirements for ERP and web application modules including AI feature scoping, documenting use cases, process flows, and BRD/SRS artifacts to guide development of 2 client deliverables from concept to UAT.
- Executed SIT and UAT test cycles for REST and SOAP APIs including AI service endpoints, logging defects through resolution and validating functional requirements against acceptance criteria to meet client quality thresholds.
- Supported ETL pipeline documentation and SQL query development for data migration activities feeding analytics and AI training pipelines, preserving metadata integrity and ensuring accurate record transformation.

Business Analyst (FL State Government — Licensing & Regulatory Systems)

Kyra Solutions, Inc.

Ahmedabad, India (USA) | 06/2018 – 11/2019

- Elicited requirements for Florida state licensing and regulatory systems through JAD workshops with 8+ stakeholders, developing business cases, BPMN process flows, and UML diagrams to modernize Government compliance tracking.
- Produced system integration specifications and maintained RTMs across 2 releases, coordinating UAT cycles and release documentation to support on-time go-live for agency-wide deployments.

Jr. Business Analyst (Recruitment Technology & HR Systems)

IMS People Pvt. Ltd.

Ahmedabad, India (UK) | 07/2016 – 06/2018

- Documented RPO and CRM requirements for HR systems, built SQL reports and data extracts to support HR analytics, and conducted UAT and defect management while maintaining stakeholder communication across UK-based recruitment operations.

EDUCATION

- MBA, Business Analytics — **University Canada West (06/2025)**
- B.E., Electrical Engineering — **Gujarat Technological University (2016)**
