

Rahul Jogi

Canada | (236) 865-2049 | rahuljogi187@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst with 8+ years translating complex business needs into technical solutions, including 4+ years delivering AI/ML-enabled platforms, conversational AI, and intelligent automation. Proven expertise eliciting requirements for LLM and NLP systems, defining AI model acceptance criteria, and governing model lifecycle from training through production. Combines deep ERP/CRM domain knowledge with hands-on AI implementation experience across FinTech, InsureTech, and Higher Education.

CORE COMPETENCIES

Business Analysis & Process: BRD, FSD, SRS, RTM, User Stories, Use Cases, Acceptance Criteria, BABOK, BPMN 2.0, UML, JAD, AS-IS/TO-BE Mapping, Workflow Re-engineering, Scrum, Sprint Planning, Backlog Prioritization, Jira, Confluence, Trello

AI/ML & Intelligent Automation: LLMs, GenAI, NLP, Conversational AI, Prompt Engineering, Model Performance Metrics, Model Drift Monitoring, Responsible AI, Bias Mitigation, MLOps Governance, Automated Document Processing, Predictive Analytics, AI Risk Frameworks

Data & BI: SQL, Power BI (DAX/RLS), Tableau, ETL, STTM, Data Governance, Metadata Documentation

Systems & Integration: SAP S/4HANA, ERP, CRM, REST/SOAP APIs, OAuth, OpenAPI/Swagger, Payload Mapping, AI Engine Integration

Compliance & Risk: FERPA, GDPR, PCI DSS, AML/KYC, SOX, IAM, RBAC, ISO 27001, SFTR, CIRO, Vulnerability Assessments

Domains: Wealth Management, Capital Markets, FinTech, InsureTech, Higher Education, Government

PROFESSIONAL EXPERIENCE

Business Analyst — Contract & Consulting

Various Clients (Wealth Management, SaaS, Non-Profit)

Toronto, ON | 07/2025 – Present

- Led requirements engineering and authored BRD/FSD/SRS artifacts for 6 concurrent AI/ML engagements including a multi-agent orchestration framework, an autonomous trading system, an intelligent automation suite (n8n, ComfyUI, Google Opaal), an AI job-matching agent, an AI-powered dropshipping engine, and confidential Enterprise AI solutions, eliciting business and functional requirements for LLM-powered tools and automated document processing across Wealth Management, SaaS, and Non-Profit sectors.
- Facilitated JAD sessions with stakeholders to define AI model acceptance criteria, performance benchmarks, and drift monitoring frameworks for NLP conversational agents, reinforcement-learning trading models, semantic job-matching engines, demand-forecasting dropshipping algorithms, and multi-agent orchestration protocols, ensuring 100% RTM traceability and business readiness before production deployment.

- Modeled AS-IS/TO-BE workflows using BPMN 2.0 and UML to re-engineer CRM, ERP, and e-commerce operations integrating AI recommendation engines, autonomous agent chains, no-code automation pipelines (n8n, ComfyUI, Google Opaal), and supply-chain orchestration, eliminating redundant handoffs and improving cycle time by 20%.
- Authored user stories, use cases, and detailed acceptance criteria for 3 concurrent engagements including AI automation modules, multi-agent orchestration frameworks, and an AI job-matching agent, coordinating SIT and UAT cycles in Jira and Confluence that resolved 25+ defects with zero-severity blockers at go-live.
- Built Power BI dashboards and SQL extracts to monitor AI system outputs, model drift patterns, and automation ROI across agent orchestration, algorithmic trading, dropshipping demand-forecasting, and confidential Enterprise AI pipelines, enforcing data governance standards and ETL documentation while cutting manual reconciliation effort by 15 hours weekly..

Business Solutions Analyst

Uni. Canada West: Digital Transformation (ERP/ CRM/ AI Automation) Vancouver, BC | 09/2023 – 06/2025

- Led requirements engineering for Higher Education digital transformation including AI/ML-enabled workflows: predictive risk scoring, automated document processing, and student-service case automation across SAP S/4HANA ERP and CRM systems.
- Facilitated 15+ JAD sessions with academic, financial, and compliance stakeholders to define business, functional, and UX requirements for AI-automated systems, ensuring 100% RTM traceability under BABOK guidelines.
- Modeled AS-IS/TO-BE business processes using BPMN 2.0 and UML, identifying bottlenecks in AI-enabled student service workflows that reduced case resolution time by 25%.
- Analyzed REST and SOAP API integration requirements for AI/ML services and student information systems, reviewing OpenAPI/Swagger specifications, OAuth authentication flows, and payload mapping logic to ensure secure, error-resilient data exchange.
- Directed SIT, UAT, and regression testing for SAP S/4HANA releases including AI module validation, performing defect triage and user-story validation that accelerated deployment cycles by 20%.
- Created executive-facing Power BI dashboards with DAX calculations and RLS configurations, alongside SQL reports and ETL STTM documentation, to visualize AI automation ROI and enrollment trends while aligning IAM and RBAC policies with FERPA data-privacy and audit requirements.

Business Solutions Analyst & Project Coordinator (FinTech/ERP/Compliance - Enterprise Exposure)

Xomic Infotech Pvt. Ltd. (FinTech SaaS Platform) Ahmedabad, India | 08/2022 – 08/2023

- Defined BRD, SRS, and functional requirements for a FinTech SaaS platform incorporating AI engines for real-time fraud detection, payment processing, and AML/KYC workflows under PCI DSS security standards and SOX financial reporting controls.
- Re-engineered Capital Markets transaction workflows using BPMN 2.0 and UML AS-IS/TO-BE maps, optimizing AI-driven resource allocation and throughput to lower operational costs by 18% within two quarters.
- Performed API integration analysis for AI/ML engines and payment gateways including Stripe and PayPal, documenting REST and SOAP payload structures, OAuth protocols, and error-handling logic to enable real-time ERP and CRM interoperability.
- Authored ETL specifications, SQL transformation scripts, and metadata documentation to standardize training and inference data for AI models, then designed Tableau KPI dashboards that supported C-suite executive decision-making and data governance.

- Managed Scrum delivery processes including sprint planning, backlog prioritization, and daily stand-ups in Jira and Confluence for a 12-member team, releasing 4 major platform updates including AI feature rollouts while coordinating GDPR data-privacy reviews and vulnerability assessments.

AI Business Solutions Analyst (Agile BSA / Product Owner Proxy) & Client Success Manager

Floatbot.ai (FinTech & InsureTech SaaS Platform based on AI NLP) Bengaluru, India (USA) | 08/2020 – 08/2022

- Led end-to-end business analysis for conversational AI and NLP-based automation tools serving FinTech and InsureTech clients, authoring user stories and acceptance criteria that improved claims processing efficiency by 30%.
- Defined AI model performance metrics, accuracy benchmarks, and drift monitoring frameworks for NLP and sentiment analysis models, ensuring alignment with Responsible AI principles, ISO 27001, SFTR, and CISO compliance.
- Developed business cases and UX specifications for AI-powered CRM enhancements and customer-facing portals, increasing user adoption by 40% and reducing average transaction processing time through iterative SIT and UAT cycles.
- Led hypercare support and operational handovers for 3 AI production releases, creating Power BI and Tableau compliance monitoring dashboards with statistical forecasting models while reducing post-production defects by 30% via structured QA and defect tracking in Jira and Confluence.

Business Analyst

CRB Tech Solutions Pvt. Ltd.

Pune, India | 11/2019 – 08/2020

- Gathered business requirements for ERP and web application modules including AI feature scoping, documenting use cases, process flows, and BRD/SRS artifacts to guide development of 2 client deliverables from concept to UAT.
- Executed SIT and UAT test cycles for REST and SOAP APIs including AI service endpoints, logging defects through resolution and validating functional requirements against acceptance criteria to meet client quality thresholds.
- Supported ETL pipeline documentation and SQL query development for data migration activities feeding analytics and AI training pipelines, preserving metadata integrity and ensuring accurate record transformation.

Business Analyst (FL State Government — Licensing & Regulatory Systems)

Kyra Solutions, Inc.

Ahmedabad, India (USA) | 06/2018 – 11/2019

- Elicited requirements for Florida state licensing and regulatory systems through JAD workshops with 8+ stakeholders, developing business cases, BPMN process flows, and UML diagrams to modernize Government compliance tracking.
- Produced system integration specifications and maintained RTMs across 2 releases, coordinating UAT cycles and release documentation to support on-time go-live for agency-wide deployments.

Jr. Business Analyst (Recruitment Technology & HR Systems)

IMS People Pvt. Ltd.

Ahmedabad, India (UK) | 07/2016 – 06/2018

- Documented RPO and CRM requirements for HR systems, built SQL reports and data extracts to support HR analytics, and conducted UAT and defect management while maintaining stakeholder communication across UK-based recruitment operations.
-

EDUCATION

- MBA, Business Analytics — **University Canada West (06/2025)**
- B.E., Electrical Engineering — **Gujarat Technological University (2016)**
